-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, 5-7, 9, 11 and 24-26 are drawn to a method for modulating metabolism of ciprofloxacin-resistant *Streptococcus pneumoniae*, classified in class 514, subclass 312+.
  - II. Claims 3-4, 8, 10 and 17-19, drawn to method for treating or preventing a bacterial infection by ciprofloxacin-resistant *Streptococcus pneumoniae*, classified in class 514, subclass 312+.
  - III. Claims 12, 13, 16-18, 20 and 30-32 are drawn to a method modulating the metabolism of ciprofloxacin-sensitive *Streptococcus pneumoniae*, classified in class 514, subclass 312+.
  - IV. Claims 14, 15, 19 and 33-35, drawn to method for treating or preventing a bacterial infection by ciprofloxacin-sensitive *Streptococcus pneumoniae*, classified in class 514, subclass 312+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different

functions, specifically group I modulates the metabolism of ciprofloxacin-resistant *Streptococcus pneumoniae* while the method of group II is drawn to the treatment or prevention of a bacterial infection of ciprofloxacin-resistant *Streptococcus pneumoniae*.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, specifically group III modulates the metabolism of ciprofloxacin-sensitive *Streptococcus pneumoniae* while the method of group IV is drawn to the treatment or prevention of a bacterial infection of ciprofloxacin-sensitive *Streptococcus pneumoniae*.

Inventions I-II and III-IV are unrelated. Inventions are unrelated if it can be shown that they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, specifically groups I-II deal with ciprofloxacin-resistant *Streptococcus pneumoniae* while the methods of groups III-IV are drawn to ciprofloxacin-sensitive *Streptococcus pneumoniae*.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Andrew Sonu on 5 May 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Margaret Seaman whose telephone number is 571-272-0694. The examiner can normally be reached on 630am-4pm, First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joe McKane can be reached on 571-272-0699. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
